

Flood Retention Facility Fish Passage

Fish Passage During Construction

The proposed project includes temporary fish passage during construction using a river bypass tunnel.

Fish Passage During Normal Flows

Following construction, fish would pass upstream and downstream of the structure through low-level passageways that would remain open during normal conditions and smaller floods.

Fish Passage During Major Floods

During major floods, the low-level outlet would be closed, blocking fish passage. A fish collection, handling, transport, and release facility (trap and haul) would be used when the structure outlets are closed.
