WDFW, Grays Harbor Conservation District and Forterra

is working on

EF Satsop River Restoration, Salzer Creek Restoration Project/ Davis Creek Property Acquisition)

that involves

WDFW in collaboration with the Grays Harbor Conservation District and Forterra is proposing to build a river restoration project on the Wynoochee River between the Wynoochee-Wishkah Road bridge and the Old White Bridge/WDFW public access point. The project involves building large wood structures in the river, planting native trees and shrubs along the river, and creating side channels to improve habitat for salmon and fish. Construction is expected to occur in summer 2021-2022.

We have identified you as an nearby landowner and would like to solicit your feedback on this project.
